SUMMARY

Frontend & Design Engineer with 6+ years building React and Next.js products and a degree in Design & Visual Communication. Tech Lead of a 15-person UX Development team serving 10+ clients across North America, Europe and LATAM. Works with AI agents daily (Claude Code, Claude API, MCP, Cursor), builds LLM-powered apps and cut MVP delivery time by up to 40% with AI-assisted workflows. Strong in design systems, micro-frontends, accessibility and performance.

EXPERIENCE

Senior Frontend Developer / Tech Lead, UX Development · Making Sense Jul 2022 – Present

- Lead a 15-person UX Development team across 10+ international clients as acting area manager: delivery, architecture, code quality, 1:1s, performance reviews and staff augmentation.
- Cut MVP delivery time by up to 40% by bringing AI into discovery, UI/UX and coding workflows (Claude Code, Claude API, Cursor, Codex); ran multiple discovery phases and MVPs end to end.
- Led two Java to React migrations, improving performance, reaching WCAG 2.1 AA and lifting client conversion ~10%.
- Architected React/Next.js apps, micro-frontends and design systems (Storybook, design tokens) shipped to production with strong SEO and Lighthouse 95+ scores; contributed React Native features for mobile.
- Built data-heavy dashboards over large datasets (D3, Chart.js, Recharts on GraphQL), SMS marketing features for Attentive and SendGrid email templates for Vetsource.
- Set up E2E testing (Cypress, Playwright), Datadog observability and CI/CD pipelines to Vercel and AWS.
- Ran hiring for the area: interviewed 30+ candidates; designed the technical challenge and onboarding process.
- **Clients:** Sony, Attentive, Vetsource, Aquia, MM411, CPI, VAS, Albor, Fox Rent a Car, Gramercy Clinic.

Web Development Professor · Coderhouse Feb 2023 – Jul 2024

- Taught 60+ students HTML, CSS, JavaScript, React and Git; mentored capstone projects with high satisfaction ratings.

Frontend Developer · Garaje de Ideas Americas / Vidoomy Mar 2020 – Jul 2022

- Ran 25+ A/B tests (Vanilla JS, Google Optimize) for fintech and banking clients in Argentina and Spain (Banco Santander).
- Built an internal Vue.js SPA for video advertising operations, cutting campaign setup time by 35%.

SELECTED AI PROJECTS

- **AI Sticker Generator** — React + Express app that generates stickers with the OpenAI Images API (generation and selfie edits), composites overlays client-side, stores results in Supabase and triggers n8n workflows.
- **FuelCore AI** — nutrition app with onboarding questionnaires, personalized meal plans and AI-generated recipes using the Gemini API.
- **Production-Ready UI** — Next.js + TypeScript starter with atomic design, white-label theming via design tokens, accessible Radix/shadcn-style components, Storybook and Jest/RTL.

SKILLS

AI engineering: Claude Code, Claude API, MCP, agents & skills, Cursor, Codex, OpenAI & Gemini APIs, n8n
Frontend: TypeScript, JavaScript, React, Next.js, React Native, Vue.js, GraphQL, REST
UI & design systems: Tailwind CSS, shadcn/ui, Radix, MUI, Storybook, Sass, Figma, design tokens, WCAG 2.1 AA
Data & analytics: D3, Chart.js, Recharts, Datadog, Google Analytics, GTM, A/B testing
Testing & delivery: Jest, Cypress, Playwright, GitHub Actions, Jenkins, Docker, Vercel, AWS
Platforms: Contentful, Strapi, WordPress, AEM, HubSpot, Stripe, SendGrid, Attentive

CERTIFICATIONS

Anthropic: Claude Certified Architect (in progress), Claude Code 101, Intro to Skills & AI Agents, Claude API (2025)
Product Owner Training, Kinetic (2024) · Frontend React.js, Coderhouse (2022) · Scrum Basics, LinkedIn (2021)

EDUCATION & LANGUAGES

B.A. Design & Visual Communication, National University of Lanús (2012) · Network & Internet Infrastructure, Cisco (2012)
